Geocaching Policy on Opacum Land Trust properties

Geocaching is allowed as a passive recreational activity on properties owned by Opacum Land Trust, with the following provisions:

- Those placing Geocaches on an Opacum property will provide Opacum notice of when and where a Geocache is placed on a property, including providing a precise description or photo of the Geocache device.
- There is a limit of 3 Geocaches on any 1 Opacum property per Geocaching event.
- Any liability resulting from the placement, search for, or other activities associated with Geocaches are not the responsibility of Opacum Land Trust, and Opacum Land Trust will not be responsible for any Geocaches placed on its properties.
- Geocaches should not be placed in fragile environmental locations, dangerous locations (e.g. on cliff faces or very steep slopes), in or on trees and branches over 5 feet from the ground, or in any situation that might lead users onto other properties abutting Opacum's or into fragile or dangerous locations.
- Opacum Land Trust reserves the right to remove and dispose of any Geocaches it feels are in violation of this policy, which appear to not be maintained / in active use, or for any reason that Opacum Land Trust, in its sole right as property owner, decides that the Geocache should be removed.
- Opacum Land Trust reserves the right to deny the use of its property for Geocaching by some or all individuals and groups.

This policy applies only to properties that Opacum Land Trust owns in fee. Access and use of properties for which Opacum Land Trust holds a Conservation Restriction is solely up to the fee owner of those properties in regard to Geocaching and other activities permitted by the CR.

Approved by Opacum Land Trust Board of Directors, 7/16/2020
